

# \$5,000 Computer Center

---

The Computer Center is equipped with modern and upgraded computers for use by our teens. Staff and volunteers teach critical computer skills to youth whose access to technology would otherwise be limited. Additionally, it is important for our youth to learn important computer skills in order to function in today's world.

The Computer Center is also used during the school day by educators as a teaching aid, and as an innovative and creative way to teach course curriculum. In the evenings, the Center is used for special classes such as web-design, computer graphics and audio/visual classes or for individual use by the children for homework or to catch up on email.
